

## The NWH Group & Rainbow Restoration Partnership

### Client

Rainbow Restoration

### Services Provided

Trade Waste & Skip Hire

### Partnership Benefit

The partnership with the NWH Group helped Rainbow Restoration reduce travel time, cut operational costs, and lower their carbon footprint through convenient, local waste solutions.

## Overview

The NWH Group partnered with Rainbow Restoration, a national leader in restoration and specialised cleaning services, facing the challenge of efficiently managing waste across a vast geographic area, stretching from Wick to Dumfries and Skye to Elgin. To improve operational efficiency and reduce their environmental impact, Rainbow Restoration sought a waste management partner that could provide local, responsive, and cost-effective solutions.

## Testimonial

*"We have been given a great service from The NWH Group. Michelle in particular has been very helpful and great to deal with."*

**- Helen Cox, Rainbow Restoration**

## Project Challenges

With teams operating across the entirety of Scotland, Rainbow Restoration needed convenient and reliable waste disposal options to reduce travel time, cut fuel costs, and improve efficiency. Using various disposal sites across the country had previously been the norm, but this approach came with logistical complications, increased emissions, and added operational strain.

## The NWH Group's Solutions

Recognising the convenience of The NWH Group's local facility, Rainbow Restoration opened an account to streamline waste disposal for their drivers. The NWH Group delivered a tailored solution of trade waste and skip hire services, designed to meet their operational demands. Throughout the partnership, the NWH Group's team, and especially their account manager, Michelle Lindsay, provided attentive, practical support that ensured efficient coordination and dependable service.

## The Results

- **Immediate Operational Benefits:** The local facility allowed Rainbow Restoration to cut down significantly on travel time and associated costs, which are benefits they noticed instantly.
- **Cost & Time Savings:** Though not formally measured, however, the reduced need for long-distance travel resulted in clear savings on fuel and manpower.
- **Lower Carbon Footprint:** The shorter travel distances supported the company's broader sustainability goals by reducing vehicle emissions.
- **Compliance & Support:** Clear guidance from the NWH Group improved confidence in waste handling and regulatory compliance.
- **Unexpected Gains:** The streamlined process brought additional operational efficiencies and supported staff productivity across service areas.

## Conclusion

The partnership between Rainbow Restoration and the NWH Group has proven to be both practical and impactful. By leveraging the convenience of a local facility and receiving tailored waste services, Rainbow Restoration has improved operational efficiency, reduced environmental impact, and enhanced day-to-day logistics for their teams. The reliable, responsive support has reinforced the NWH Group as a trusted partner in helping the business meet both its service delivery and sustainability goals.
